

WELCOME

We are a firm of professional, skilled electrical contractors that specialise in the design, installation and maintenance of electrical and mechanical building services for businesses across the South East.

We pride ourselves in delivering a highly professional, cost effective and reliable service, which is responsive to our client's needs.

Flexibility, technical expertise, strong resources and total commitment to customer satisfaction ensures that from initial enquiry to project completion our professional team always provide a superior service making DW Electrical your ideal services provider.

“DW carried out the small power and lighting installation to the Rosewood London Hotel for the front of house and back of house areas. They proved to be incredibly pro-active, professional and courteous.”

Mark Shade,
Senior MEP Services Manager,
Rosewood London Hotel

EXPERTS...

...IN COMMERCIAL ELECTRICAL DESIGN, INSTALLATION, TESTING AND MAINTENANCE

Established in 1989, DW Electrical has a wealth of experience in commercial and industrial projects. Whatever your need or size of project, our team of highly skilled, experienced and trained electricians can help.

We can assist you with individual projects and/or provide you with an on-going maintenance and support programme to ensure your business remains compliant and fully operational at all times.

Our core business has been built on strong working relationships with our clients. With a policy of continual improvement we are always looking to form new working relationships and partnerships with those who share our visions and values.

TAILORED TO YOU

“I have worked with DW Electrical on numerous occasions and I have enjoyed the experience. They are a very professional outfit who carry out a quality installation to tight programme periods. I would not hesitate to recommend them.”

Dean Richardson,
Project Director, Collins Construction

We understand that different businesses can have very different needs. We can work with you to a schedule that suits the needs of your business and with minimum disruption, including our electricians working out of hours when required.

CASE STUDY ► CHANCERY COURT HOTEL

Located in the Heart of London the Chancery Court Hotel in Holborn, now the newly refurbished Rosewood London, combines English Heritage with contemporary sophistication.

As part of this refurbishment we were instructed by our client to carry out a major part of the electrical installation services.

We were responsible for the lighting and power to the front of house and back of house areas, including the external lighting to this Hotel's grand façade. Due to the location and load restrictions on the pedestrian area below we were unable to use conventional mechanical platforms or scaffolding for access, we therefore enlisted the services of an abseiling company who trained our electrician to join their team and carry out the installation of the external lighting by roped access.

DESIGN

Our DW design department can undertake all elements of design requirements for any project, and will support you from concept to completion working closely with you, your architect and project teams, from initial assessment, feasibility studies and site surveys they will continue to develop the project through to production of a full design specifications and working drawings. Our highly skilled design engineers, CAD technicians, and support staff use the latest design software.

Whether you need a straightforward, tried and tested installation or a bespoke design for a state of the art project our design department will offer the solution.

SAFETY & SERVICE

With DW Electrical you can be assured of receiving a high level of service and safety. We are members of the ECA, NICEIC and MCS*, and we adhere to the Renewable Energy Consumer Code. We are also a 'Registered Competent Person - Electrical' and 'SafeContractor' approved.

We take the safety of your property, our staff and sub-contractors extremely seriously and all our operatives hold Construction Safety Certification Scheme (CSCS) Cards as an absolute minimum.

* For DW Energy only

CASE STUDY ► SANDBROOK COURT

Our client, W Stirland demolished a retirement home in Hassocks and replaced it with 8 new build, modern flats. We were then instructed to design the entire electrical installation for the project, including layout, accessories and light fittings, both internally and externally.

We then completed the electrical installation for the entire property, which consisted of the 8 flats, communal areas and grounds.

The installation included all lighting, power, external lighting (including lamp posts), fire alarms and door entry systems.

“DW Electrical provided detailed designs on time, carried out works in a diligent manner, kept me in the loop regarding any variations and worked in a timely manner within the programme. The site managers, contract manager and designer also provided positive feedback with the works carried out.”

Chris Chubb, Project Surveyor, W Stirland

WHY CHOOSE OUR MAINTENANCE SERVICE?

- ▶ **SAVE MONEY**
Regular maintenance ensures that your systems: remain efficient, last longer, and save energy.
- ▶ **PRIORITY SERVICE**
As a member of our maintenance service, you will also be given a priority service for emergencies and breakdowns.
- ▶ **TESTING**
When we come to maintain your systems we can also carry out any routine testing that may be required and issue any necessary certificates for your records/ insurance purposes.
- ▶ **SAFETY**
A scheduled plan of maintenance significantly minimises the risk of any danger to you or your staff.
- ▶ **AUTOMATIC NOTIFICATION**
We will provide you with a schedule of maintenance, so that you know when and how often we will need to visit your premises.
- ▶ **AVOID DISRUPTION**
Electrical faults can cause a significant disruption, loss of income, damage and considerable costs for repair.
- ▶ **AVOID LEGAL ACTION**
Make sure you're not breaking the law which could leave you without insurance, or prevent you from being issued a license to trade.

Please note: if we identify any urgent work that needs to be carried out, this must be addressed before a regular maintenance schedule can be implemented.

“I have very much enjoyed working with DW Electrical. They have always been reliable, on budget and gone that extra mile when needed. For example, once towards the end of a school holiday our fire alarm system failed and they pulled out the stops by working overnight, evenings and weekends until it was fixed ready for the pupils return. This was an outstanding effort and we were thoroughly grateful. I enjoy working with them and hope to continue doing so for many years to come.”

Richard Moses
Estates Bursar for the Burgess Hill School for Girls

We are also experts in Domestic Electrical Design, Installation, Testing and Maintenance. Our specialist small works department are able to assist homeowners with projects of any size, from installing an extra socket to completely rewiring of a property.

Having provided electrical services to homeowners across the South East for over 25 years, DW Electrical continues to provide professional electrical services to the local community.

CASE STUDY ► THE CANNON

The Cannon is an urban retreat in the heart of The City just a short walk from St. Paul's Cathedral, The Bank of England and the historic Tower of London. It offers a blend of contemporary design, history and urban living from SACO (the Serviced Apartment Company), which has 30,000 serviced apartments in over 220 destinations worldwide.

DW Electrical completed the entire electrical installation to all 77 studio's and one bedroom serviced apartments as well as the 24 hour front of house reception area and communal lounge, which is an imaginative social space designed to offer a calm place to be when you're ready to escape the city or your apartment.

Works included installing power outlets with multi socket plugs (including integrated USB ports), lighting, data, TV points, fire alarms, door entry, CCTV and underfloor heating. We also installed UPS's (uninterruptible power source), which are electrical apparatus that provide emergency power to a load when the input power source or mains power fails.
